Update: In the past year, heat pump cooling and heating of the rooms were implemented, and the owner also started the installation of the attic.

The design of the staircase has already been completed, so there is an opportunity to create 10 more rooms in the attic, so we will almost double our capacity.

Hopefully, the planned solar panels will be installed in the spring, so the hotel will be almost completely self-sustaining. Of course, inflation has raised the price of real estate in Hungary as well. (approx. 35%)

So the sale price has been adapted to reflect the inflation and the above-mentioned developments.

The hotel complex enjoys an exceptional location in Southwest Hungary, right on the shores of a Lake and close to Croatia. The complex is unique in that it is located in a strong bioenergy area (excellent for healing)

The lake (700 hectares) is crystal clear and suitable for fishing, diving, sailing, swimming or other water sports.

Its surroundings are large game areas, a favorite of hunters. The complex and its surroundings are very popular. +
